

## EnviroShield - Water based release agent

- 1) Apply one light coat of ENVIROSHIELD to a small area of the mould using a clean, lint free cloth or paper towel, or hand sprayer.
- 2) Wait approximately 2 minutes, then lightly wipe over the mould surface using a separate clean paper towel or lint free cloth.
- 3) Wait 15 minutes and apply the second coat.
- 4) Wait approximately 2 minutes, and then lightly wipe over the mould surface using a further clean, lint free cloth or paper towel.
- 5) Allow a set time of 30 minutes before using the mould, however application to a warm surface (by use of hot air, heat gun, oven), will reduce the waiting period.
- 6) For touch up apply a single coat of ENVIROSHIELD as above and continue processing.

DOT HAZARD CLASSIFICATION: Flammable Liquid 3  
DOT I.D. NUMBER: UN 1866
